

ENVIRONMENTAL AND SOCIAL POLICY

JSC Georgia Healthcare Group (“**GHG**”) recognises that the activities of the GHG and its subsidiary undertakings (together, the **Group**) may impact the environment and the community in which it operates directly and indirectly, through the business of its clients.

The Group is committed to conducting its business in an environmentally, socially responsible and sustainable manner in order to reduce the environmental impact of its operations, while at the same time improving social performance in order to enhance long-term returns to its shareholders. In maintaining international best practice in environmental and social risk management, the Group is committed to ensuring that its subsidiary businesses are also fulfilling their environmental and social responsibilities. With regard to our contractors, the Group regards compliance with applicable environmental, health and safety and labour regulations and the use of sound environmental, health and safety, and labour practices as important factors in demonstrating effective corporate governance.

The Board of Directors of the GHG has adopted this Environmental and Social Policy, which describes the Group's commitment to sustainable finance as an integral component of responsible corporate governance and implementation of environmental and social risk management policies and procedures in connection with its commercial activities.

The Group undertakes to:

1. recognise sustainable development as a corporate commitment, sound business management and an integral part of its pursuit of good corporate citizenship;
2. be an environmentally responsible business by minimising the environmental impact of its operations and acting promptly to reduce or respond to incidents that endanger health, safety or the environment;
3. conduct all activities in compliance with relevant environmental legislation and regulations in the regions in which the Group operates;
4. provide a clean, safe and healthy workplace for employees, with appropriate training where necessary to ensure compliance and to communicate regularly with employees about the aims of, and their responsibilities under, the Environmental and Social Policy;
5. conserve natural resources by improving the energy efficiency of buildings, reducing energy consumption and the level of harmful emissions, tracking the annual quantity of greenhouse gas emissions in tonnes of carbon dioxide, and reduce the consumption of materials by reusing and recycling where possible; and
6. require its employees to adhere to environmental and social risk management policies and procedures in order to fulfil their own environmental and social responsibilities, as described in detail below.

ENVIRONMENTAL AND SOCIAL RISK MANAGEMENT PROCEDURES

In order to ensure that appropriate, risk-based, sector-specific, environmental and social risk assessment is applied to its commercial activities, the Group has fully integrated international best practice environmental and social risk management policies and procedures (referred to as **Procedures**) into its risk management processes.

The objective of applying these Procedures is to focus upon the environmental and social issues associated with commercial activities in order to maximise the opportunities for environmentally and socially responsible and sustainable economic development, and to minimise the Group's exposure to environmentally or socially derived financial, reputational and legal risks and liabilities associated with its financial transactions.

Implementation of the Procedures includes comprehensive consideration of the following

Transaction Categorisation and Qualification: Before or at the first discussion with material counterparty, the relevant Group member will assess the relative level of environmental and social risk associated with the potential client's and/or other counterparty's business activities and consider whether the potential client's and/or other counterparty's business activity or proposed transaction is subject to any exclusions or restrictions, imposed by any applicable laws, regulations, contracts or otherwise.

Evaluation and Control: Based on the level of environmental and social risk associated with material counterparty's business activities or proposed transaction, and the analysis of the material procedures and measures in place to mitigate such risk, the relevant member of the Group will analyse the potential environmental and social impacts to warrant compliance with relevant environmental, health and safety, labour regulations and standards as well as public disclosure standards. In addition, the Group (or the relevant member thereof) may consult industry specific guidance as well as seek the counsel and/or assistance of external advisors in connection with the drafting of relevant documentation and/or appropriate action plans.

Monitoring and Reporting: The Group will regularly monitor the environmental and social risk associated with its activities, compliance by clients within the terms of their respective agreements, and will report such compliance as required or appropriate.

PUBLIC AWARENESS AND COMMUNICATION

The Group, through its parent company, is committed to communicating its Environmental and Social Policy publicly and will provide regular updates to shareholders via the Annual Report and Accounts on the progress of the Group's environmental performance. The Group will also conduct formal reviews of this Environmental and Social Policy from time to time in order to ensure that its policies and business actions promote the consideration of the environment and sustainable development.
